MEMORANDUM FOR: Chief, Test and Evaluation Branch, ESD/TSG
THROUGH : Deputy Chief, Research and Engineering Division
SUBJECT : Test and Evaluation Report of the [] Retrojet
Film Drive System

25X1

The referenced report is very good, but two comments could be added to perhaps give the report better perspective. First, in the "Conclusions and Recommendations," it might be added that new drive systems built since the inception of this contract by [] for the 1540 light table far outperform the [] and the older [] drive system, thereby precluding further work on this project. Second, in section 5.12, it might be noted at the end of the section that the clearance problem could be easily rectified by the addition of a spacer bar between the table and the bracket support.
